

1. Prepare drawn CAM data (concepts,
incl. emotional evaluation and
connections)

2. Translation process: German concepts
translated into English

3. Development of coding guidelines

Literature search
(top down)

Collected data
(bottom up)

4. Employment of coding guidelines:
categorize drawn concepts into
categories

5. Applied quantitative analyses to
investigate difference between
categories separately for (soft) RR, SAR

6. Employed Large Language Models
(Llama-3.1-70B-Instruct; gpt-3.5-turbo)
to semi-automatically summarize
categories
